

INVITATION TO PARTICIPATE

Co-Creating Futures at the Climate-AMR-Animal Health Nexus Regional Foresight Workshop

You are invited to participate in a **Regional Foresight Workshop** for the **Foresight InnoVet-AMR** project, led by Purple Compass and supported by the International Development Research Centre (IDRC), and the Global AMR Innovation Fund (GAMRIF), part of UK Government's Department of Health and Social Care (DHSC).

As climate change accelerates, antimicrobial resistance (AMR) continues to rise—reshaping animal health, human health, food systems, livelihoods, and ecosystems. The convergence of these forces is creating complex, interconnected risks that no single sector, discipline, or geography can address alone.

This moment calls for **collective foresight**.

Why This Workshop Matters

The Foresight InnoVet-AMR project is building a foresight ecosystem—an inclusive engagement that brings together diverse perspectives to explore what is emerging, what is constraining progress, and what is possible at **the climate change-AMR-animal health nexus**.

We are hosting **three regional workshops—Southeast Asia, Africa, and Latin America**—to create space for open dialogue across the AMR community. These workshops are designed as **knowledge-exchange** platforms, where regional insights, lived experience, and expert intelligence can shape future-focused thinking and action.

What Your Perspective Contributes

Your experience and insights can help surface:

- **Signals of change**, emerging issues, and systemic vulnerabilities
- **Barriers and resistance** that continue to lock systems into the past
- **Opportunities for preparedness, adaptation, and innovation**
- **Shared visions for transformation** to secure more resilient futures

The outcomes of this workshop will directly inform **foresight scenarios**, regional insights, and strategic intelligence for **decision-makers and research funders**.

INVITATION TO PARTICIPATE

Co-Creating Futures at the Climate-AMR-Animal Health Nexus

Regional Foresight Workshop

You are invited to participate in a **Regional Foresight Workshop** for the **Foresight InnoVet-AMR** project, led by Purple Compass and supported by the International Development Research Centre (IDRC), and the Global AMR Innovation Fund (GAMRIF), part of UK Government's Department of Health and Social Care (DHSC).

Workshop Details

⌚ Duration: 120 minutes

📅 Dates:

Southeast Asia: February 3, 2026 at 8:00pm EST [[registration](#)]

Africa: February 5, 2026 at 8:00am EST [[registration](#)]

Latin America: February 6, 2026 at 10am EST [[registration](#)]

Why Participate?

By participating, you will contribute to a new body of forward-looking knowledge at the intersection of **climate change, AMR, and animal health**—helping shape strategic planning, investment priorities, and future pathways that aim for the most positive and equitable outcomes.
